Tanie strony internetowe Mateusz Ludyga

May 2021 - June 2021

Wordpress Developer Intern

- Creating Wordpress websites for clients
- Copywriting
- Optimizing websites for SEO

Projects

e-commerce (ReactJS, Node) - [Github](#)

e-commerce shop created using the MERN stack. The application loads products from a MongoDB database and displays them. User can:

- Select to display products in a single category.
- Click on any product to get more information.
- Select items and add them to their shopping cart.
- Create their own account.

Dashboard (ReactJS) - [Github](#)

Dashboard to monitor e-commerce sales, orders and user activity. Created using react-google-charts, CircularProgressbar.

Spotify-web-api-node (ReactJS, Node) - [Github](#)

Api based on spotify-web-api-node repository. Includes working access token and refresh token. Can be used to split with UI design.

a-tel Andrzej Borzek (ReactJS, Node) - [Github](#) | [Website](#)

Website developed for a fiber optic telecommunications company. We worked in a team of two to create responsive design and implement it in React and Node.js.

Interests

Web development, RPGs, Fantasy books
